Source: American Housing Survey, 1997, 1999, 2001, 2003, 2005, and the authors' calculations.

2003 & 2005 use alternative weights provided by the Joint Center for Housing Studies. Values for 2003 differ from prior publications because of the use of revised weights and a revision to the working status criteria (earnings of minors are omitted).

Earnings of minors are omitted from 2003 & 2005.

This omits two categories: Low-Income Working and "Other". The highest value attained among these is 149000 in "Other" in 2005.
