The Honorable Ken Calvert Chairman U.S. House of Representatives Committee on Appropriations Subcommittee on Interior, Environment, and Related Agencies Washington, DC 20515

The Honorable Betty McCollum Ranking Member U.S. House of Representatives Committee on Appropriations Subcommittee on Interior, Environment, and Related Agencies Washington, DC 20515

RE: Support for FY2017 and FY2018 Funding for ENERGY STAR®

Dear Chairman Calvert and Ranking Member McCollum:

We, the undersigned organizations and businesses, write today to express our strong support for the ENERGY STAR® program. This voluntary partnership program—which includes ENERGY STAR Buildings and Plants, Home Performance with ENERGY STAR for existing homes and certified new homes, and ENERGY STAR for Small Business, as well as ENERGY STAR labeled products—helps businesses, state and local governments, non-profit organizations, institutions of higher education, homeowners, and consumers save money by investing in energy efficiency. ENERGY STAR accomplishes several highly desirable goals at once: it helps consumers reduce high energy bills, promotes economic growth by stimulating investment in new technology, reduces pollution through cost-effective measures, and helps ensure the reliability of our electric system by reducing peak demand. We urge you to support at least level funding for the ENERGY STAR program for Fiscal Year (FY) 2017 and FY2018.

ENERGY STAR has a proven track record of success and is extremely cost-effective. Today, ENERGY STAR enjoys brand awareness of about 90%, which makes it the most widely recognized symbol for energy efficiency. For every incremental dollar Americans invested in energy efficiency under ENERGY STAR, they reduced their energy bills by an average of \$4.50. In 2015 alone, American consumers and businesses saved over \$34 billion with the help of ENERGY STAR. Since 1992, ENERGY STAR has helped families and businesses save \$430 billion on utility bills, while reducing greenhouse gas emissions by 2.7 billion metric tons. Through brand recognition, information and positive publicity, the ENERGY STAR program has provided the catalyst for many consumers, homeowners, businesses, and state and local governments to invest in energy efficiency.

ENERGY STAR serves broad constituencies across every state in the country, working with over 16,000 partners. In the energy efficiency sector, 2.2 million Americans work in whole or in part on the design, manufacture, and installation of ENERGY STAR products and under ENERGY STAR programs. ENERGY STAR includes over 1,800 manufacturing partners of over 70 different product categories, who sold more than 300 million qualified products in the U.S. in 2015. About 45% of the commercial building floor space in the U.S. has been benchmarked for tracking and analyzing energy consumption using ENERGY STAR's Portfolio

March 21, 2017 Re: Support for FY2017 and FY2018 Funding for ENERGY STAR®

Manager. ENERGY STAR also counts more than 3,100 home builder partners who constructed almost 1.8 million certified new homes since 1995. In 2015, families living in ENERGY STAR certified homes saved over \$625 million on utility bills, while 89,000 households hired 1,600 contractors to implement improvements and whole-house retrofit projects with Home Performance with ENERGY STAR. Utilities and states across the country—including 45 local sponsors of Home Performance programs—use ENERGY STAR in their own energy efficiency programs and rely on it to reliably and affordably meet their energy needs.

Unpredictable energy costs and growing consumer and business demand make today's investments in energy efficiency ever more vital to America's energy security. It is important to emphasize that ENERGY STAR is a voluntary program that works with business and helps them with brand recognition. We believe that the wide range of benefits of ENERGY STAR, realized across the entire U.S. economy, make it worthy of your support in FY2017 and FY2018.

Thank you for your consideration.

Sincerely,

3M
